

A little light, kept.

A warm, private, non-clinical wellbeing companion for unpaid family carers.

Non-clinical

18+

Free

Wellnetix Ltd · United Kingdom

THE PROBLEM

Carers hold everyone together, and quietly fall apart.

Unpaid carers are exhausted, isolated and under-supported. The work is relentless — and almost entirely invisible.

63%

of carers say caring has harmed their mental health

~1 in 5

is at risk of burnout

Many don't even call themselves a carer.

THE SCALE

A vast, invisible, growing population.

UNITED KINGDOM

5.8M **£184bn**

unpaid carers

of care each year

About a second NHS.

UNITED STATES

63M

family caregivers · +45% since 2015

\$1.01T

of care each year

Around 1 in 4 adults.

Sources: Carers UK 2025 · AARP 2026

WHO CARERS ARE

Every kind of carer.

●
Caring for a parent through
dementia

●
Caring for a partner through
cancer

●
A parent of a disabled or
autistic child

●
The parent of an adult child
living with mental illness

●
A young-adult carer, just
turned 18

●
Someone in the after of loss

Different lives, the same quiet weight.

WHY TODAY'S SUPPORT FAILS THEM

Nothing is built for the carer.

Clinical apps

Feel medical and judgy — built around symptoms and diagnoses, not a carer's life.

Wellness apps

Pile on streaks, scores and guilt — one more thing to fail at on a hard day.

Carer services

Fragmented and hard to reach — postcode lotteries, waiting lists, forms.

Carers don't need another to-do list.

THE SOLUTION

You look after them. CARER looks after a little of you.

A companion that listens

Remembers your words
— never verdicts

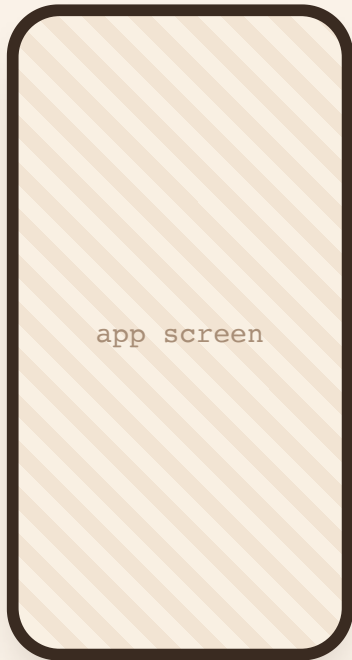

Never scores you

Points to real help, when
you want it

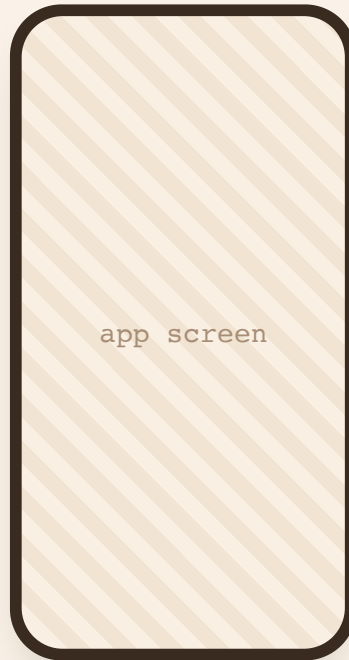

A little light, kept.

THE EXPERIENCE

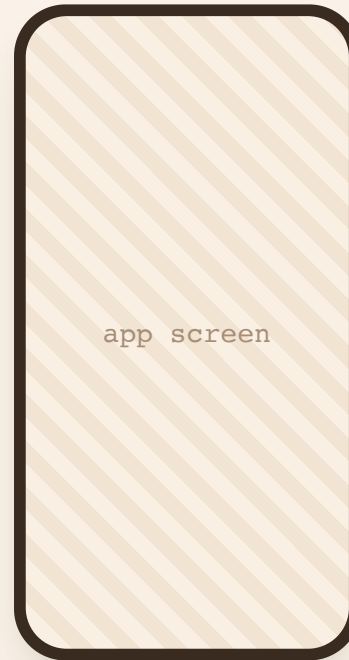

What it feels like.

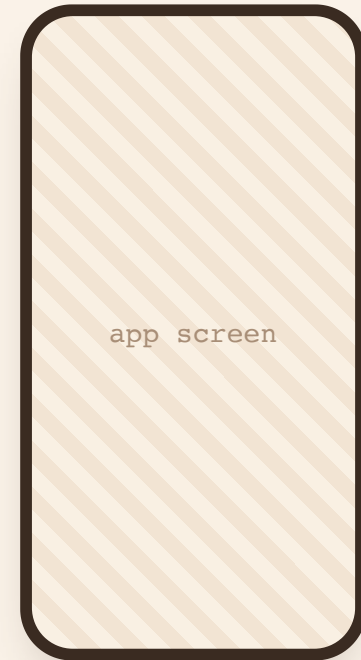

A companion that listens

Your words, remembered

No scores. No streaks.

Help, one tap away

PRODUCT

Built to hold you, not to manage you.

Companion chat

A warm voice that listens

Memory

Holds your words, never
verdicts

No-score reflection

Notice, without measuring

A private space

Yours alone

A grief space

For the after of loss

Your journey

Your story, in your words

Crisis & safeguarding

Four directions · free · offline ·
one tap

Disease-aware signposting

To real charities and real help

Gentle notifications

With quiet hours

On-device AI

Private by design

Export or delete

Anytime, in full

OUR CONSTITUTION

A different set of rules.

1 We never score you.

2 Your words stay yours — never verdicts.

3 We never build a profile of the person you care for.

4 No streaks, no guilt, no engagement traps.

5 Safety sits outside the AI model.

6 Non-clinical by design.

7 Built for every kind of carer.

SAFETY & ETHICS

Safety is the spine, not a feature.

For you

When the weight is too much to carry alone

For the person you care for

When they are the one in danger

Harm from others

When someone in your life is the danger

Safeguarding

Protecting a child or vulnerable adult

Free

Offline

One tap

Works before sign-in

Independent of the AI

Region-aware crisis resources. UK + US now; a safe global fallback everywhere else.

Governed. UK GDPR, consent-first, clinical-safety + DPO governance.

TECHNOLOGY & MOAT

Private by architecture. Safe by design.

On-device AI

Runs on the phone. Works offline.
Your words don't leave the device
by default.

A deterministic safety spine

The crisis gate and classifiers run
outside the warm model — safety
can't be bypassed. Independently
red-teamed; all tests green.

Portable backend

All-API architecture with end-to-
end encryption — no lock-in, no
data lake.

THE MOAT Carer-specific design · a safety architecture competitors don't have · privacy by default

THE SCIENCE

Grounded in evidence, built to a constitution.

Research + lived experience

Built on carer-wellbeing research and PPIE — carers shaping the product throughout.

A written, enforced constitution

Non-clinical and consent-first — rules the product cannot break.

Signposting, not advice

CARER points to real help — it never diagnoses, treats or prescribes.

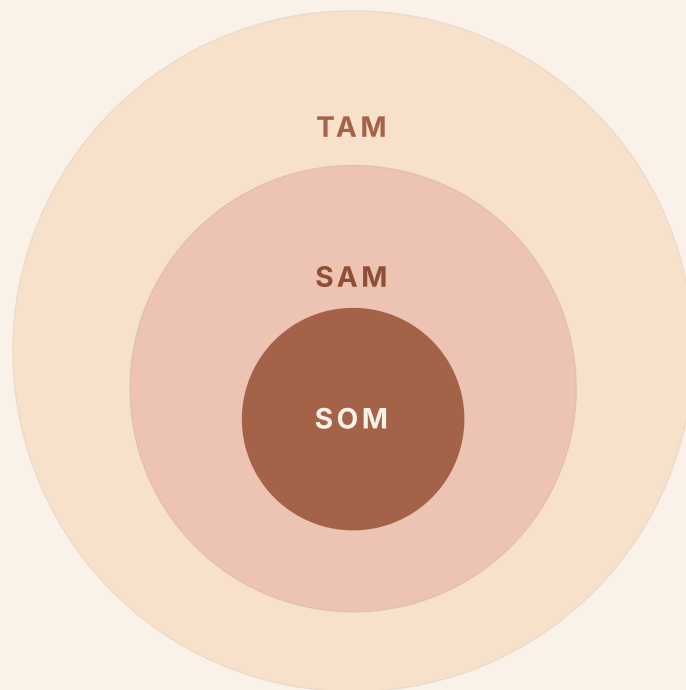

Independently tested

Red-teamed safety and grounding, verified by outside eyes.

A privacy-preserving, consent-based foundation for carer-wellbeing research at scale.

MARKET SIZE

A large market meeting a vast need.

TAM · DIGITAL MENTAL HEALTH

~\$33bn → ~\$180bn

2025 → 2035, ~18.5% CAGR · mental-health apps ~\$9bn → ~\$23bn by 2030

SAM · LAUNCH MARKETS

~69M adult carers

UK 5.8M + US 63M

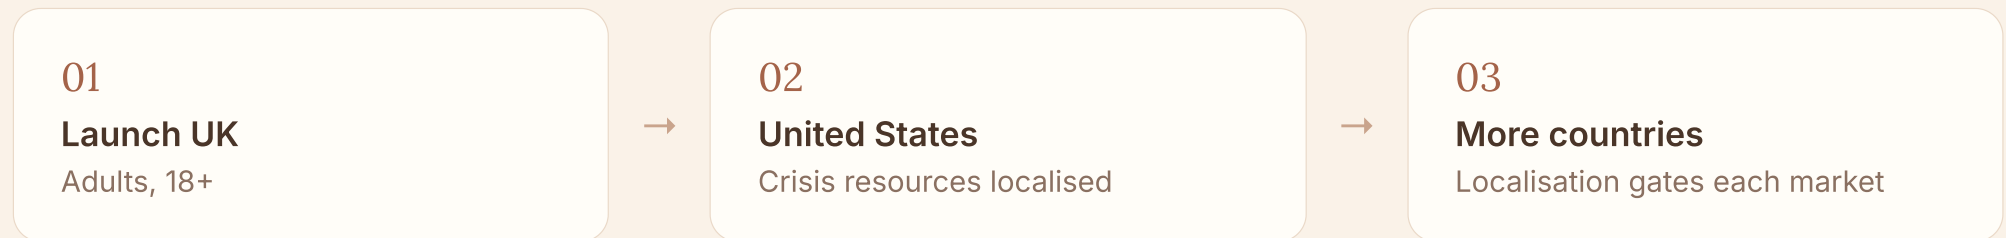

SOM · THE WEDGE

An early, reachable wedge of UK adult carers — via early access and carer-organisation & employer partnerships.

Sources: industry market reports 2025; Carers UK; AARP.

GO-TO-MARKET

UK first, then the world, safely.

CHANNELS

Carer charities — Carers UK, Carers Trust

NHS & local authorities

Employer carer-benefit schemes

App stores

Organic & social

Free removes all friction.

BUSINESS MODEL

Free for carers. Sustainable by design.

ALWAYS FREE

The core is free — for accessibility, and for trust.
Crisis support is always free, for everyone.

SUSTAINED BY

An optional supporter tier and donations, plus
partnerships with the NHS, councils, employers
and charities.

Never by charging carers. Never by selling data.

COMPETITIVE LANDSCAPE

Where CARER sits.

Non-clinical · Generic Headspace Calm	Non-clinical · Carer-specific C carer Alone here — private, on-device, safety-first
Clinical · Generic Wysa Woebot	Services · Carer-specific Mobilise Carers UK tools

THE WEDGE

- Carer-specific
- Non-clinical
- Private & on-device
- Safety-first
- Anti-guilt

STATUS

Built, safe, and ready.

- Product feature-complete

- Region-aware crisis support live

- Full App Store + Google Play asset kit ready

- Safety gates green — crisis red-team + grounding

- Marketing website ready

- In early access

Pre-launch — a real, reviewable product. No vanity metrics.
